Seeking a challenging position in a forward-thinking company where I can utilize my expertise as a front-end developer in Reactjs and my strong skills in DSA to contribute to innovative projects and be part of a team that is making a significant impact.

PROJECTS

➢ **LEGAL MINDSET (Reactjs)**
This project focuses on developing an AI-driven legal information platform using advanced NLP models like GPT and BERT to streamline legal research. It provides users, including legal professionals and the public, with access to case laws, judgments, and statutes through semantic search, document summarization, and personalized recommendations

➢ **STUDENT DASHBOARD USING QR SCANNER** (Flask)
Scan the QR code to access your student dashboard, Personal and Professional Details of the student , Raising the complaint .

➢ **MOVIE RECOMMENDATION ENGINE** (JAVA)
Dynamic movie recommendation system considers user age, genre preferences, and language. Versatile, personalized suggestions offer a tailored viewing experience for a diverse audience.

➢ **TIC TAC TOE** (Python)
Classic Tic-Tac-Toe for 2 players. Text interface, alternating turns, winner checks, draw logic, restart option. Clear organized, error- handling, 2D grid, user- friendly.
